Position Grid Synopsis

Position Grid is an X_TRADER® Pro plug-in application for the risk administrator. This graphical tool groups the high, low and current profit and loss for each trader's account, including spreads, into an easy-to-read grid format. Its drag-and-drop feature provides the ability to quickly combine multiple accounts for one trader. The graphical P&L bars and color-coded open/close positions make it easy to quickly determine where each trader stands in relation to the current day's high and low. The display starts from a firm's overall status then breaks down each trader's status with each product listed beneath.

Key Features

- Web-based system to display open position and P&L
- Displays high, low and current P&L in a graphical format
- Quickly identify open/closed position and P&L on the basis of firm, trader and contract
- Calculate the P&L of spreads
- Combine accounts and list an alias
- New traders and products automatically added to the system
- Ability to save workspace; no configuration time
- Log in as TTADM to see all traders' positions

View Firm, Trader and Contract status in one place

Requirements: X_TRADER Pro
X_TRADER API
