AutoLaunch Synopsis

AutoLaunch is a plug-in application for X_TRADER® that automatically logs in traders to multiple gateways simultaneously. The application is password protected for multiple users so that different traders can save their own login information. In addition to logging in to TT gateways, AutoLaunch allows users to automatically launch any or all plug-in products after logging in to X_TRADER. The application also has the ability to close and log out of X_TRADER and all plug-in applications.

Key Features

- Automatically launches X_TRADER and plug-in applications
- Supports logging in to multiple gateways with a single username and password
- Enables traders to close and log out of all TT applications with one button
- Trader's user name and password information are stored in an AutoLaunch.ini file with the password encrypted for only trader's machine
- Setup window allows for modification of existing user configurations and also allows for the creation of new users
- Allows for creation of a custom message box that appears to users when AutoLaunch initiates
- Closing X_TRADER will cause AutoLaunch to shut down all plug-in applications

Requirements: X_TRADER Pro
X_TRADER API

Suitable Market: Traders
