EFRT Synopsis

EFRT (Exchange Fill Ratio Tracker) was originally designed for the Eurex exchange when it started imposing fees for excessive quoting. Now this innovative plug-in application for X_TRADER® Pro can be used on all Exchanges. EFRT will allow traders to see the ratio of quotes (adds, changes and deletes) to fills in a small, discrete window.

A configuration file allows the user to define which exchanges to track, the fill ratio and the threshold for which fines are assessed. If the number of quotes exceeds the threshold and the ratio is surpassed, an alarm will engage.

Key Features

- Application tracks and displays current quotient of quote to fills
- Displays thresholds for quantity and ratio, and signals when both are past them
- Adjustable menu allows traders to choose Hide, Close or Always on Top
- See the number of adds, changes, deletes and fills or double click to hide quotient details

See all the order details (above)

or

Double click to see only the fill ratio (below)

Requirements: X_TRADER Pro
X_TRADER API

Suitable Market: Individual Traders
