### Order Ticket Tracker Synopsis

The Order Ticket Tracker (OTT) utilizes the TT FIX Gateway to allow users to easily enter external fills. External fills are defined as any fills outside of TT. OTC trades, exchange floor trades and electronic trades that are completed through a non-TT application are considered external fills. The user must install OTT and a TT FIX Gateway, which can be installed on the same machine. Product definitions will be maintained in a flat file by the user and inserted by OTT upon start-up.

### Key Features

- Enables TT users to easily enter external fills into the TT universe through any standard X\_TRADER® product
- Orders are filled immediately at the price and quantity entered
- External fills will be broadcast in the TT universe in the same manner as all other fills
- Login functionality is the same for logging in to all TT gateways
- External fills can be entered on all products that are configured to trade on the TT FIX Gateway
- Fills are recognized by the Fill Window and can be uniquely displayed with a black background in Fill Recapper

**Requirements:** X\_TRADER®  
TT FIX Gateway

**Suitable Market:** Risk Administrators, Traders and Brokers
