## STIR Position Monitor Synopsis

STIR Position Monitor is a plug-in application for X\_TRADER® Pro that tracks and displays an individual trader's position in the separate months of the STIR, as well as aggregate positions for the Front, Red, Green, Blue and Gold years, and an overall position. It displays the net change and last traded price for each month, and calculates and displays the net change pack price for each year and for the 2, 3, 4 and 5-year bundles. Data from the STIR Position Monitor can be saved to a text file at any point during the trading day. Products can be loaded either from these text files or by dragging and dropping STIR contracts from the X\_TRADER Market Grid or the Market Explorer.

## Key Features

- Display all quarterly contracts grouped by year for the first five years (e.g., Front, Red, Green, Blue and Gold)
- A year is defined as four consecutive quarters starting from the current quarter (e.g., Jun05, Sep05, Dec05, Mar06)
- Display long/short position for each individual contract
- Display net long/short position for each year (Front, Red, Green, Blue and Gold)
- Display overall long/short position
- Display last traded price for each individual contract
- Display net change (in ticks) of last traded price from settlement for each individual contract or based on the bid/ask
- Display net change pack price for each year by averaging net change of each quarter for that year or by total change
- Display net change price for 2yr, 3yr, 4yr and 5yr bundle as average or total change
- Automatically account for contract rollover
- Ability to load incomplete bundles (< 20 contracts)
- Print Position Window to a text file
- Load products from text file, X\_TRADER Market Grid or Market Explorer

**Requirements:** X\_TRADER Pro  
X\_TRADER API

**Suitable Market:** Traders and Risk Administrator
