Trade Tracker Synopsis

Trade Tracker is a stand-alone application for use with X_TRADER® that consists of a server-side database, which records all order and fill information. This data can be logged across exchanges and traders into a SQL Server database. Trade Tracker records all adds, changes, deletes and fills that are accepted by the exchange. A firm can use Trade Tracker to record a multi-year archive of trading activity.

Key Features

- Records all adds, changes, deletes and fills that are accepted by the exchange in real time
- Runs continuously, every day, all day long
- Automatically logs in to the specified gateways with the user-defined logins and encrypted passwords
- Information can quickly and easily be retrieved by querying the SQL database

Requirements: Trade Tracker license
X_TRADER API
SQL Server 7.0/2000

Suitable Market: Risk Administrators
